1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.

2. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its component parts and understanding how they are related.

3. The third step is to develop a plan. This involves deciding on the best way to solve the problem and setting out the steps that need to be taken.

4. The fourth step is to implement the plan. This involves putting the plan into action and making sure that everyone is doing their part.

5. The final step is to evaluate the results. This involves checking to see if the problem has been solved and if the solution was the best one possible.
